OUR PRODUCTS

Coconut Fiber (Coir) Pots

Product Description

Coir pots are biodegradable containers made from natural coconut fibers, designed for sustainable gardening. They promote healthy root growth and can be directly planted into the soil without causing root disturbance.

Advantages

- ✓ 100% biodegradable and eco-friendly alternative to plastic pots, reducing plastic waste
- ✓ Provides excellent aeration and moisture retention
- ✓ Minimizes transplant shock

Application

- Nurseries & Greenhouses (as seed starter pots)
- Landscaping (Direct transplant to soil)
- Personal gardening
- Gifting (small saplings as gifts)
